

9. (Amended) The fuel-cell according to Claim 1, wherein the electrolyte is in the form of a membrane, in particular made of Naphion.

10. (Amended) The fuel-cell according to Claim 1, wherein the electrolyte has a composite structure comprising Naphion and zeolite.

11. (Amended) The fuel-cell according to Claim 1, wherein the means for conducting electrical current to the first electrode and the second electrode are in the form of metallic layers.

22. (Amended) The fuel-cell according to Claim 1, wherein the flexible substrate is in the form of a ribbon developing in length and capable of being rolled up.

23. (Amended) The fuel-cell according to Claim 1, wherein the fuel is methanol in aqueous solution.--

IN THE ABSTRACT:

Please delete the improper second paragraph of the Abstract containing the parenthetical phrase "(Figure 2)".
